

UNIVERSITY *of* WASHINGTON

## UWTV Retransmission

UWTV connects the world with the University of Washington by giving voice and visibility to the researchers and scholars whose discoveries are at the heart of our university. UWTV offers its programming for retransmission free of charge.

## Spread the word

Introduce your viewing audience to UWTV through a press release highlighting the diverse educational programming available through UWTV. The template below can help you get started:

Headline

DATELINE — UWTV, a service of the University of Washington, is now available in your area through (retransmission system). You can watch UWTV by tuning in to (viewing information).

An educational television channel, UWTV connects the world with the University of Washington by sharing the work of UW's researchers and scholars through television and online video. UWTV's diverse programming explores the breakthrough technology, sciences, health and medicine, economics, humanities, social sciences and engineering advances happening at the University of Washington.

UWTV is now available to more than 2 million satellite and cable television subscribers in Washington state. Viewers from 210 countries also tune in online to watch live 24-hour-a-day webstreaming and access our extensive online video library at [uwtv.org](http://uwtv.org).

## The University of Washington and ResearchChannel

The University of Washington also manages operations for ResearchChannel, a national educational television channel. Founded by the University of Washington as a way to share breakthrough research with the public, the ResearchChannel consortium includes many prestigious universities and research organizations. Programming ranging from breakthrough technology and science innovations to fascinating arts and humanities topics is shared in its original form and without interruption.

ResearchChannel is also available for free retransmission via a Ku-band digital signal from Galaxy-18. Please see [researchchannel.org](http://researchchannel.org) for more details.

*It's about discovery*
